## VMWare Horizon

### Use VMWare Horizon for Remote Access

1. Continue to use the <http://support.hshs.org> page for the installation of remote access software **on your personal device only** (i.e. this does not apply to HSHS owned/provided devices).
2. Access <https://home.hshs.org> to log in to **HSHS Home**.
3. When prompted to log in, be sure to verify/select the correct domain.

vmware

4. Upon the first access, the window defaults to the **Catalog** tab. Click the **Open** button of the application you want to launch.

We recommend bookmarking your favorite applications. Please use the below steps to efficiently bookmark your desired applications. **Note: Epic** and the **HSHS Desktop** are automatically bookmarked.

5. Click the **Catalog** tab to view all applications to which you have access.
6. Click the **Bookmark** flag (highlighted by the black box above).
7. Click the icon located in the **Bookmarks** tab to open the application.
